DIPLOMA PROGRAMME PRACTICE / HL / SET B

Psychology / Paper 3

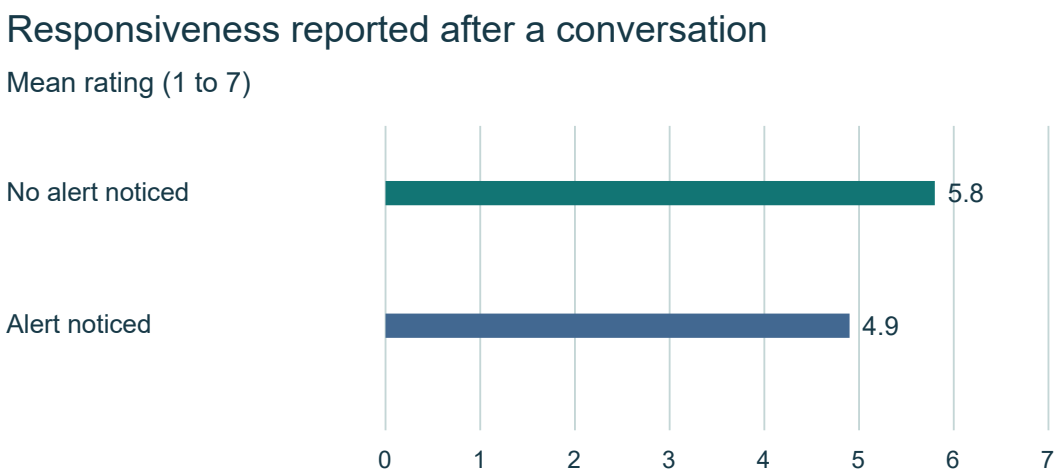

Question booklet · 105 minutes · 30 marks

Answer all four questions. Source 1 appears with Question 1. Use the accompanying resource booklet for Sources 2–5. In Question 4 integrate at least three of Sources 2–5 and your own psychological knowledge.

Write your responses on separate answer paper. Use the marks beside each question to guide your time.

QUESTION 1 / 3 MARKS

Claim for this paper: visible phone notifications during a face-to-face conversation reduce a partner's perceived responsiveness. Source 1. After a café conversation, one member of each adult pair reported noticing either no notifications or at least one. They rated how responsive their partner had seemed. The graph shows the mean rating on a seven-point scale, from 1 (not at all responsive) to 7 (very responsive). The two groups were formed from the reports, not assigned. These research materials are constructed.

Constructed research data.

Explain one issue that limits interpretation of the graph in Source 1.

QUESTION 2 / 6 MARKS

Analyse the findings from Source 2 and state a conclusion about whether visible notifications reduce perceived responsiveness.

QUESTION 3 / 6 MARKS

To what extent are the findings in Source 3 transferable to other people or conversational settings?

QUESTION 4 / 15 MARKS

To what extent can we conclude that visible notifications reduce a conversation partner's perceived responsiveness? Use your own knowledge of the role of technology and at least three of Sources 2–5.
